

Installation Services - MekPro Engineering Solutions

Our Installation Expertise

At MekPro Engineering Solutions, we specialize in delivering high-quality mechanical installation services tailored to meet the needs of various industries. Our expert team of mechanical fitters is equipped with the skills, experience, and tools to handle a wide range of equipment and systems with precision and efficiency.

We offer full mechanical installation support across industrial sectors, including mining, manufacturing, energy, water treatment, and processing plants. Whether it's a new installation, system upgrade, or equipment replacement, MekPro is your trusted partner for reliable and professional service.

- Rotating Equipment:

Precise installation of turbines, fans, compressors, and other high-speed machinery to ensure safe and efficient performance.

- Gearboxes & Motors:

Expert alignment and fitting of gearboxes and electric motors for optimal operation and minimal downtime.

- Piping Systems:

Custom pipework installations for water, air, oil, and chemical systems, including fabrication and high-pressure fittings.

- Conveyor Systems:

Design support, layout, and installation of conveyor systems for smooth and uninterrupted material flow.

- Pumping Systems:

Installation and commissioning of all types of pumps, including centrifugal, positive displacement, and submersible systems.

Why Choose MekPro?

- Skilled and certified mechanical fitters

Installation Services - MekPro Engineering Solutions

- Adherence to safety and industry standards
- Timely project completion and minimal downtime
- Customized solutions for complex installations
- 24/7 support for critical systems
